

Your First AI Employee

A one-page reference for briefing, dispatching, and recovering your AI Chief of Staff.

6 + 1 modules

2 missions · 7 power-ups

1 operating system

THE SYSTEM

What you now own.

- **AI Chief of Staff** · named, role-confirmed
- **Working folder** · one place all work lives
- **Business context** · raw material organized for AI
- **Standing instructions** · CLAUDE.md and AGENTS.md
- **AI org chart** · the team you can grow into
- **Course skill** · reusable working pattern
- **Social and SEO Strategy** · first locked deliverable
- **AI Employee Roadmap** · next 90 days, named

```

THE MOVE

Brief, do not prompt.

Front-load the mission. Then say go.

1	OUTCOME	<i>What you want produced.</i>
2	CONTEXT	<i>Where the source material lives.</i>
3	WHY	<i>The business reason it matters.</i>
4	QUALITY BAR	<i>What good looks like to you.</i>
5	GUARDRAILS	<i>What it must not do.</i>
6	AUTONOMY	<i>Clarify or proceed with labeled assumptions.</i>

MISSION HANDOFF TEMPLATE

Produce [outcome]. Use [context]. The reason this matters is [business reason]. The quality bar is [standard]. Avoid [bad output]. If you need one or two answers that would materially change the work, ask now. Otherwise, make reasonable assumptions, label them, and proceed until you have a complete draft for review.

THE RECOVERY

If your AI gets weird.

TOO MANY QUESTIONS

Use your best judgment on the rest. Make reasonable assumptions, label them clearly, and proceed with the draft.

TOO MANY CHECK-INS

You are checking in too much. Act like my Chief of Staff. Use the context you have, complete the draft, and bring it back when it is ready for review.

OUTPUT SOUNDS GENERIC

This reads generic. Diagnose whether it is thin context, a missing standing instruction, or an unsupported assumption. Ask one question, then revise.

IT JUST WORKS

Let it work. Review the output when it comes back.

LOCK PHRASE

This version is locked. Treat it as our standing reference going forward. Update the relevant operating docs so future work uses this version.
